Response to request
for comments re

Labeling of irradiated
2553 '99 MAY 19 P4:37
foods --

Labeling should be
prominent, honest
and continue. The
terms "irradiated"
and "irradiation"
should be used --
not cover-ups like
cold pasteurization.

98N-1038

C2228

Reason of labeling
would be misleading
because irradictio
cancer changed
not allowed to
continue at point of
purchase, but while
was in fact dense
nutrients or food
safely.
